PROJECT TITLE: STREAMLINING TICKET ASSIGNMENTS FOR EFFICIENT SUPPORT

INTRODUCTION

SUPPORT TEAMS IN MANY ORGANIZATIONS HANDLE A LARGE NUMBER OF SERVICE TICKETS DAILY. MANAGING THESE TICKETS MANUALLY OR USING INEFFICIENT SYSTEMS CAN LEAD TO DELAYS, INCORRECT ASSIGNMENTS, AND POOR CUSTOMER SATISFACTION. THE PROJECT "STREAMLINING TICKET ASSIGNMENTS FOR EFFICIENT SUPPORT" AIMS TO IMPROVE THE EFFICIENCY OF TICKET MANAGEMENT BY IMPLEMENTING AN AUTOMATED WORKFLOW SYSTEM USING SERVICE NOW. THIS SYSTEM ENSURES THAT TICKETS ARE ASSIGNED TO THE RIGHT PERSON BASED ON PRIORITY, CATEGORY, AND AVAILABILITY.

PROBLEM STATEMENT

MANY SUPPORT SYSTEMS FACE ISSUES SUCH AS LACK OF PROPER TICKET ASSIGNMENT, DELAYS IN RESOLUTION, AND ABSENCE OF REAL-TIME TRACKING. TICKETS MAY BE ASSIGNED MANUALLY, LEADING TO ERRORS AND INEFFICIENCIES. THERE IS ALSO LIMITED VISIBILITY INTO WORKLOAD DISTRIBUTION AMONG TEAM MEMBERS.

OBJECTIVES OF THE PROJECT

- AUTOMATE TICKET ASSIGNMENT PROCESS
- REDUCE RESPONSE AND RESOLUTION TIME
- IMPROVE WORKLOAD DISTRIBUTION
- PROVIDE REAL-TIME TRACKING AND MONITORING
- ENHANCE OVERALL SUPPORT EFFICIENCY

EXISTING SYSTEM

THE CURRENT SYSTEM INVOLVES MANUAL OR SEMI-AUTOMATED TICKET ASSIGNMENT. THIS RESULTS IN DELAYS, MISMANAGEMENT, AND INCREASED WORKLOAD FOR SUPPORT STAFF.

PROPOSED SYSTEM

THE PROPOSED SYSTEM USES SERVICE NOW TO AUTOMATE TICKET ASSIGNMENT. TICKETS ARE AUTOMATICALLY ASSIGNED BASED ON PREDEFINED RULES SUCH

AS PRIORITY, CATEGORY, AND AGENT AVAILABILITY. THIS REDUCES MANUAL EFFORT AND IMPROVES EFFICIENCY.

EXAMPLE SCENARIO

IN A TRADITIONAL SYSTEM, A SUPPORT TICKET IS MANUALLY ASSIGNED BY A MANAGER, WHICH CAN CAUSE DELAYS. IN THE PROPOSED SYSTEM, THE TICKET IS AUTOMATICALLY ASSIGNED TO THE APPROPRIATE SUPPORT AGENT INSTANTLY.
