

2. REQUIREMENT ANALYSIS

INTRODUCTION

REQUIREMENT ANALYSIS IS AN IMPORTANT PHASE IN SYSTEM DEVELOPMENT WHERE THE NEEDS AND EXPECTATIONS OF USERS ARE IDENTIFIED AND DOCUMENTED. IN THE PROJECT 'STREAMLINING TICKET ASSIGNMENTS FOR EFFICIENT SUPPORT', THIS PHASE FOCUSES ON DEFINING SYSTEM ROLES, DATABASE STRUCTURE, AND FUNCTIONAL REQUIREMENTS NEEDED TO MANAGE AND ASSIGN SUPPORT TICKETS EFFICIENTLY.

THE MAIN GOAL IS TO ENSURE SMOOTH TICKET HANDLING, FASTER ISSUE RESOLUTION, AND IMPROVED SUPPORT TEAM PRODUCTIVITY BY AUTOMATING TICKET ASSIGNMENT AND TRACKING PROCESSES.

USER ROLES

THE SYSTEM IS DESIGNED WITH ROLE-BASED ACCESS CONTROL TO ENSURE SECURE AND EFFICIENT OPERATIONS. THE TWO MAIN ROLES ARE USER (EMPLOYEE/CUSTOMER) AND SUPPORT AGENT (ADMIN/TECHNICIAN).

USER ROLE

USERS ARE THE ONES WHO RAISE SUPPORT TICKETS WHEN THEY FACE ANY ISSUE.

THEY CAN:

- CREATE NEW SUPPORT TICKETS
- PROVIDE ISSUE DETAILS
- TRACK TICKET STATUS
- VIEW HISTORY OF SUBMITTED TICKETS

USERS CANNOT ASSIGN OR RESOLVE TICKETS, ENSURING PROPER CONTROL.

EXAMPLE:

A USER NAMED RAVI FACES A SYSTEM ISSUE AND LOGS INTO THE PORTAL. HE CREATES A TICKET DESCRIBING THE PROBLEM. THE SYSTEM AUTOMATICALLY ASSIGNS THE TICKET TO A SUPPORT AGENT.

SUPPORT AGENT ROLE

SUPPORT AGENTS HANDLE AND RESOLVE THE TICKETS.

THEY CAN:

- VIEW ASSIGNED TICKETS
- UPDATE TICKET STATUS (OPEN, IN PROGRESS, RESOLVED)
- RESPOND TO USER ISSUES
- CLOSE TICKETS AFTER RESOLUTION

THEY ENSURE TIMELY RESOLUTION AND PROPER TRACKING OF ISSUES.

EXAMPLE:

A SUPPORT AGENT RECEIVES RAVI'S TICKET. AFTER ANALYZING THE ISSUE, THE AGENT UPDATES THE STATUS TO 'IN PROGRESS' AND LATER MARKS IT AS 'RESOLVED' AFTER FIXING THE PROBLEM.

DATABASE TABLES

THE SYSTEM USES DATABASE TABLES TO MANAGE TICKET INFORMATION EFFICIENTLY.

TICKET TABLE

FIELDS INCLUDE:

- TICKET ID
- USER NAME
- ISSUE DESCRIPTION
- PRIORITY LEVEL
- STATUS
- ASSIGNED AGENT

USER TABLE

FIELDS INCLUDE:

- USER ID
- NAME
- EMAIL
- ROLE

AGENT TABLE

FIELDS INCLUDE:

- AGENT ID
- NAME
- SPECIALIZATION
- AVAILABILITY STATUS

CONCLUSION

THE REQUIREMENT ANALYSIS PHASE HELPS IN UNDERSTANDING SYSTEM FUNCTIONALITY, USER ROLES, AND DATA STRUCTURE. IT ENSURES THAT THE

SYSTEM IS DESIGNED EFFECTIVELY TO STREAMLINE TICKET ASSIGNMENTS AND
IMPROVE SUPPORT EFFICIENCY.
